

N9000 Series

Built your way

Ideal for panels of up to 200kg.

Precision bearing components for reduced rolling resistance

Moulded glass-filled nylon housing for customisation and durability

Made with durability in mind

Features and Benefits:

- 100kg load capacity, enables you to build larger, heavier doors of up to 200kg.
- End adjustable for ease of installation.
- Polymer wheels reduce noise and minimise track wear, guaranteeing system performance over time.
- Precision bearing components reduce operating force.
- Inner carriage can be easily removed for on-site servicing.
- Housing made of non-corrosive material making it ideal for coastal applications.
- Ideal for maintaining the effectiveness of a thermally broken systems.
- Extended shroud available to reduce the risk of wheel damage during installation.

Reduced Rolling Resistance:

AAMA 906 certified for durability and performance, the N9000 provides effortless panel operation.

Standard models available with:

- **Stainless steel** or **polymer** CNC engineered wheels
- 28mm and 32mm wheel diameter
- 11.5mm adjustment range
