Share the load with more rollers

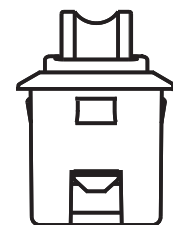

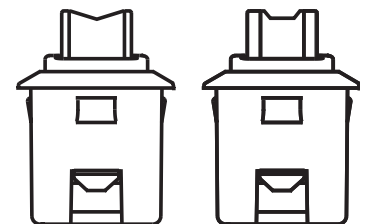

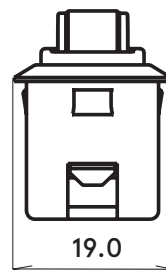

Features and Benefits:

- Self levelling spring mechanism allows the load to evenly distribute across multiple rollers
- Able to hold increased weight capacity by adding additional rollers
- Load rating of up to 30kg per roller
- Sealed precision bearing components for reduced operating force
- Easily inserted into the sill or bottom rail, saving time on installation and maintenance
- **Polymer** wheels reduce track wear ensuring the product retains its performance over time
- **Stainless steel** components for reduced risk of corrosion
- Available in **polymer** or **stainless steel** wheel variants
