Balanced load guarantees a smooth slide

Features and Benefits:

- 125kg load capacity enables you to build doors of up to 250kg
- End adjustable to suit existing rail profiles
- Made with pressed metal components and forged axles to ensure robust product under large weights
- Polymer wheels reduce noise and minimise track wear, guaranteeing system performance over time
- Precision bearing components reduce operating force
- Single bogie carriage ensures balanced load distribution which guarantees smooth system operation
- Retains structural integrity during and after installation which ensures product durability and longevity
- Wheels are fully retractable within the assembly for ease of panel installation

Reduced Rolling Resistance:

The 5000 Series is AAMA 906 certified for durability and performance and provides effortless panel operation over time.

Standard models available with:

- **Stainless steel** or **polymer** CNC engineered wheels
- 28mm, 32mm and 38mm wheel diameter
- 14mm adjustment range

Other mounting tab variants, wheel sizes and spacer attachments available upon request.
