The slimline solution for big panels

Features and Benefits:

- 200kg load capacity enables you to build doors of up to 400kg
- Face adjustable, making installation and on-site servicing easy (not adjustable under load).
- Made with pressed metal components and forged axels to ensure robust product under large weights.
- Polymer wheels reduce noise and minimise track wear, guaranteeing system performance over time.
- Precision bearing components reduce operating force.
- Dual layer bogie system ensures balanced load distribution which guarantees smooth system operation.
- Retains structural integrity during and after installation which ensures product durability and longevity.

Reduced Rolling Resistance:

The 7000Quad Series is designed for durability and performance and provides effortless panel operation over time.

Standard models available with:

- **Stainless steel** or **polymer** CNC engineered wheels
- 32mm and 38mm wheel diameter
- 7.5mm adjustment range

Other mounting tab variants, wheel sizes and spacer attachments available upon request.
